

## Getting hot water to your hand washing stations!

During this time of uncertainty, we are all taking extreme measures to make sure collectively we can stay safe while keeping our projects moving along.

To help with improving on site handwashing facilities, Reliance can provide you with small electric water heaters to supply hot water to your hand washing stations. These space saver four gallon water heaters are easy to install and can be located wherever a standard 120 volt power source is available.

Please reach out to your Reliance Builder Account Manager to learn more.

At Reliance, we are continuing to investigate other opportunities where we can do our part in helping us all stay safe while getting the job done. Please reach out to us if you have any other situation we can provide assistance with!

Stay safe and work healthy.
